

MINAMOTO®

The perfect battery for use in long term, low drain devices

A9V-P batteries provide **9 Volts** of power and have a **1200mAh** energy capacity that gives performance lasting up to five times longer than alkaline batteries. Lithium chemistry is among the most stable types of batteries, and in storage A9V-P has an incredible **10 Year Shelf Life** which makes them reliable for emergency situations. These batteries are ready for immediate use.

Application examples: alarms, radios and other emergency electronics.

Features & Benefits

- 9 Volt lithium battery
- 100% Free of Lead, Cadmium, and Mercury
- Snap Style Terminals
- Long shelf Life
- 1200mAh Energy Capacity
- Wide temperature range
