

BK946

Thermostatic heating table

1. Adopt advanced quartz infrared heating element to heat fast and high efficiency.
2. Special IC can accurately control the temperature range, which can be set between 100 degrees and 380 degrees.
3. Built-in temperature sensor, temperature measurement and actual temperature digital tube display.
4. It can be used for preheating of circuit boards and other processes that require uniform heating of the whole.
5. Anti-static design.

1. Any electronic industry sealing, dispensing and constant humidity heating.
2. Welding and maintenance of aluminum substrates in the LED industry.
3. Preheating of mold core in mold factory.
4. BGA repair solder ball, especially suitable for the desoldering work of large-size BGA.
5. Baking, drying and other temperature tests of samples heated at a constant temperature in various industries are essential tools for biology, genetics, medicine and health, environmental protection biochemical laboratories, analysis rooms, and teaching and research.

Specifications:

Model	BK946
Output Power	650W
Input voltage	AC220V/50Hz
Temperature adjustment range	50°C-350°C
Display form	LCD
Temperature stability	±2°C
Use environment	0-45°C
Dimensions	L220xW220xH110mm
Weight	3Kg
