

## TPDxF003 Four-, Six-, and Eight-Channel EMI Filters With Integrated ESD Protection

### 1 Features

- Four-, Six-, and Eight-Channel EMI Filtering for Data Ports
- –3 dB Bandwidth of 200 MHz
- Greater than 25 dB attenuation at 1 GHz
- IEC 61000-4-2 Level 4 ESD Protection
  - ±12-kV Contact Discharge
  - ±20-kV Air Gap Discharge
- Pi-Style (C-R-C) Filter Configuration (R = 100 Ω, C<sub>TOTAL</sub> = 17 pF)
- Low 10-nA Leakage Current
- Easy Flow-Through Routing

### 2 Applications

- Display Interfaces
- Cell Phones
- Tablets
- SVGA Video Connections
- Memory Interfaces

### 3 Description

The TPDxF003 family is a series of highly integrated devices designed to provide Electromagnetic Interference (EMI) filtering in all systems subjected to electromagnetic interference. These filters also provide a Transient Voltage Suppressor (TVS) diode circuit for Electrostatic Discharge (ESD) protection which prevents damage to the application when subjected to ESD stress far exceeding IEC 61000-4-2 (Level 4).

The TPDxF003 family is specified for –40°C to 85°C operation. These filters are also packaged in space-saving 0.4-mm pitch DQD packages.

#### Device Information<sup>(1)</sup>

PART NUMBER	PACKAGE	BODY SIZE (NOM)
TPD4F003	WSON (8)	1.70 mm x 1.35 mm
TPD6F003	WSON (12)	2.50 mm x 1.35 mm
TPD8F003	WSON (16)	3.30 mm x 1.35 mm

(1) For all available packages, see the orderable addendum at the end of the datasheet.

## 5 Pin Configuration and Functions

**Pin Functions - TPD4F003**

PIN		I/O	DESCRIPTION
NAME	No.		
ChX_In	1, 2, 3, 4	IO	ESD-protected channel, connected to corresponding ChX_Out
ChX_Out	5, 6, 7, 8	IO	ESD-protected channel, connected to corresponding ChX_In
GND	GND	G	Ground

**Pin Functions - TPD6F003**

PIN		I/O	Description
Name	No.		
ChX_In	1, 2, 3, 4, 5, 6	IO	ESD-protected channel, connected to corresponding ChX_Out
ChX_Out	7, 8, 9, 10, 11, 12	IO	ESD-protected channel, connected to corresponding ChX_In
GND	GND	G	Ground

**Pin Functions - TPD8F003**

PIN		I/O	Description
Name	No.		
ChX_In	1, 2, 3, 4, 5, 6, 7, 8	IO	ESD-protected channel, connected to corresponding ChX_Out
ChX_Out	9, 10, 11, 12, 13, 14, 15, 16	IO	ESD-protected channel, connected to corresponding ChX_In
GND	GND	G	Ground

## 6 Specifications

### 6.1 Absolute Maximum Ratings<sup>(1)</sup>

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
V <sub>IO</sub>	IO to GND		6	V
T <sub>J</sub>	Junction temperature		150	°C

- (1) Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated in the operational sections of the specifications is not implied. Exposure to absolute maximum rated conditions for extended periods may affect device reliability.

### 6.2 Handling Ratings

		MIN	MAX	UNIT	
T <sub>stg</sub>	Storage temperature range	-65	150	°C	
V <sub>(ESD)</sub>	Electrostatic discharge	Human body model (HBM), per ANSI/ESDA/JEDEC JS-001, all pins <sup>(1)</sup>		±15	kV
		Charged device model (CDM), per JEDEC specification JESD22-C101, all pins <sup>(2)</sup>		±1500	V
		IEC 61000-4-2 ESD Rating - Contact		±12	kV
		IEC 61000-4-2 ESD Rating - Air		±20	

- (1) JEDEC document JEP155 states that 500-V HBM allows safe manufacturing with a standard ESD control process.

- (2) JEDEC document JEP157 states that 250-V CDM allows safe manufacturing with a standard ESD control process.

### 6.3 Recommended Operating Conditions

over operating free-air temperature range (unless otherwise noted)

		MIN	MAX	UNIT
V <sub>IO</sub>		0	5.5	V
T <sub>A</sub>		-40	85	°C

### 6.4 Thermal Information

THERMAL METRIC <sup>(1)</sup>		TPD4F003	TPD6F003	TPD8F003	UNIT
		DQD			
		8 PINS	12 PINS	16 PINS	
R <sub>θJA</sub>	Junction-to-ambient thermal resistance	115.6	89.2	80.8	°C/W
R <sub>θJC(top)</sub>	Junction-to-case (top) thermal resistance	108.5	100.1	88.3	
R <sub>θJB</sub>	Junction-to-board thermal resistance	66.4	50.5	45.8	
Ψ <sub>JT</sub>	Junction-to-top characterization parameter	6.8	9.4	9.2	
Ψ <sub>JB</sub>	Junction-to-board characterization parameter	65.9	50.0	45.4	
R <sub>θJC(bot)</sub>	Junction-to-case (bottom) thermal resistance	33.2	31.0	31.8	

- (1) For more information about traditional and new thermal metrics, see the *IC Package Thermal Metrics* application report, [SPRA953](#).

### 6.5 Electrical Characteristics

T<sub>A</sub> = -40°C to 85°C (unless otherwise noted)

PARAMETER	TEST CONDITIONS	MIN	TYP <sup>(1)</sup>	MAX	UNIT	
V <sub>BR</sub>	DC breakdown voltage	I <sub>IO</sub> = 10 μA	6		V	
R	Resistance		85	100	115	Ω
C	Capacitance (C1 or C2)	V <sub>IO</sub> = 2.5 V	8.5		pF	
I <sub>IO</sub>	Channel leakage current	V <sub>IO</sub> = 3.3 V	10		nA	
f <sub>C</sub>	Cut-off frequency	Z <sub>SOURCE</sub> = 50 Ω, Z <sub>LOAD</sub> = 50 Ω	200		MHz	

- (1) Typical values are at T<sub>A</sub> = 25°C.

## 6.6 Typical Characteristics

## 7 Detailed Description

### 7.1 Overview

The TPDxF003 family is a series of highly integrated devices designed to provide EMI filtering in all systems subjected to electromagnetic interference. These filters also provide a Transient Voltage Suppressor (TVS) diode circuit for ESD protection which prevents damage to the application when subjected to ESD stress far exceeding IEC 61000-4-2 (Level 4).

### 7.2 Functional Block Diagram

### 7.3 Feature Description

The TPDxF003 family is a line of ESD and EMI filtering devices designed to reduce EMI emissions and provide system level ESD protection. Each device can dissipate ESD strikes above the maximum level specified by IEC 61000-4-2 international standard. Additionally, the EMI filtering structure reduces EMI emissions by providing high frequency roll-off.

#### 7.3.1 Four-, Six-, and Eight-Channel EMI Filtering for Data Ports

These devices provide EMI filtering for four, six, or eight channels of data lines.

#### 7.3.2 –3 dB Bandwidth of 200 MHz

These devices have a through –3dB bandwidth of 200 MHz.

#### 7.3.3 Greater Than 25 dB Attenuation at 1 GHz

Signal attenuation is above 25dB at 1 GHz, which provides significant reduction in spurious emissions.

#### 7.3.4 Robust ESD Protection Exceeds IEC 61000-4-2

The ESD protection on all pins exceeds the IEC 61000-4-2 level 4 standard. Contact ESD is rated at  $\pm 12$  kV and Air-gap ESD is rated at  $\pm 20$  kV.

#### 7.3.5 Pi-Style (C-R-C) Filter Configuration

This family of devices has a pi-style filtering configuration composed of a series resistor and two capacitors in parallel with the I/O pins. The typical resistor value is  $100\ \Omega$  and the typical capacitor values are  $8.5\ \text{pF}$  each.

#### 7.3.6 Low 10-nA Leakage Current

The I/O pins feature an ultra-low leakage current of 10-nA (typical) with a bias of 3.3 V.

#### 7.3.7 Easy Flow-Through Routing

The layout of this device makes it easy to add protection to existing layouts. The packages offer flow-through routing which requires minimal changes to existing layout for addition of these devices.

## 7.4 Device Functional Modes

The TPDxF003 family of devices are passive integrated circuits that passively filter EMI and trigger when voltages are above  $V_{BR}$  or below the lower diode voltage ( $-0.6\text{ V}$ ). During ESD events, voltages as high as  $\pm 20\text{ kV}$  (air) can be directed to ground via the internal diode network. Once the voltages on the protected line fall below the trigger levels, the device reverts to passive.

## 8 Applications and Implementation

### 8.1 Application Information

The TPDxF003 family are diode type TVS' integrated with series resistors for filtering emitted EMI. As signal passes through the device, higher frequency components are filtered out. This device also provides a path to ground during ESD events and isolates the protected IC. As the current from ESD passes through the TVS, only a small voltage drop is present across the diode. This is the voltage presented to the protected IC. In particular, these filters are ideal for EMI filtering and protecting data lines from ESD at the display, keypad, and memory interfaces.

### 8.2 Typical Application

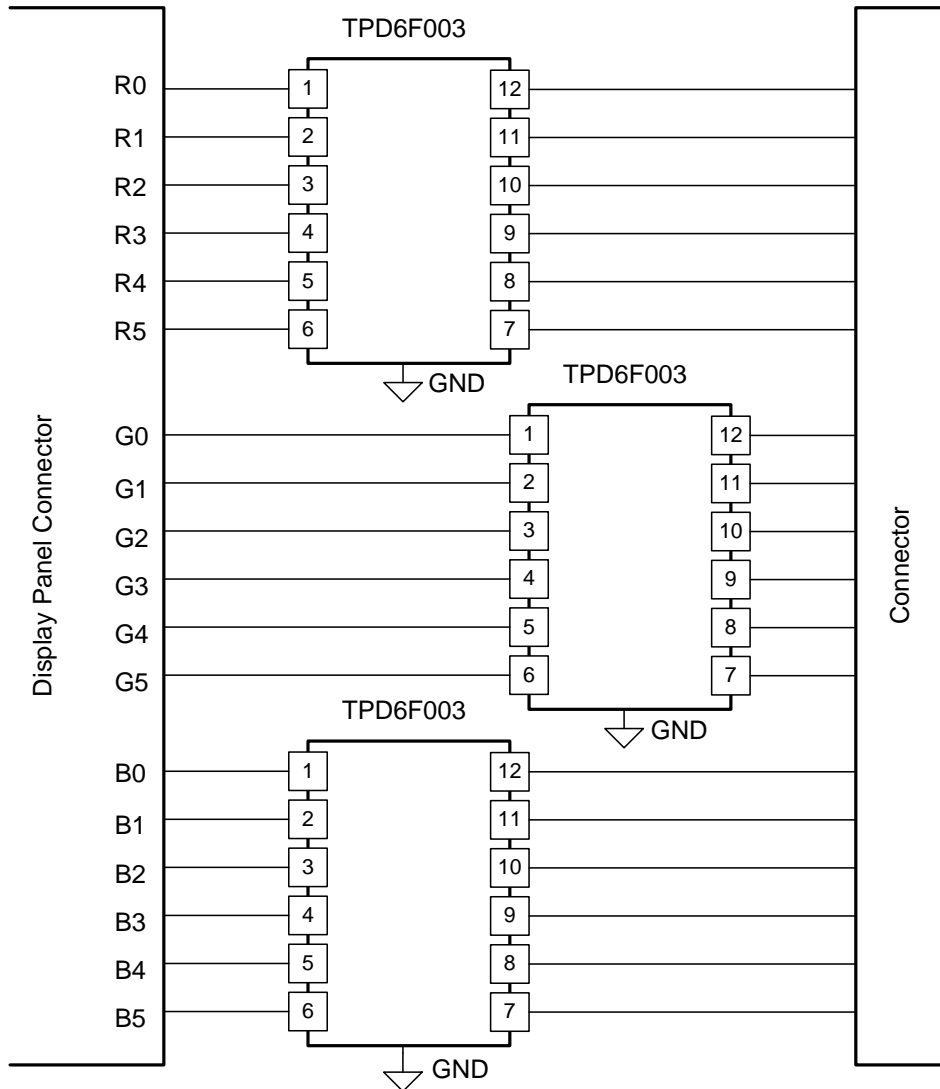

Figure 10. Display Panel Schematic

## Typical Application (continued)

### 8.2.1 Design Requirements

For this design example, three TPD6F003 devices are used in an 18-bit display panel application. This will provide a complete ESD and EMI protection solution for the display connector.

Given the display panel application, the following parameters are known.

DESIGN PARAMETER	VALUE
Signal range on all pins except GND	0 V to 5 V
Operating Frequency	100 MHz

### 8.2.2 Detailed Design Procedure

To begin the design process, some design parameters must be decided; the designer need to know the following:

- Signal range on all the protected lines
- Operating frequency

#### 8.2.2.1 Signal Range on All Protected Lines

The TPD6F003 has 8 identical protection channels for signal lines. All I/O pins will support a signal range from 0 to 5.5 V.

#### 8.2.2.2 Operating Frequency

The TPD6F003 has a 200 MHz –3dB bandwidth, which supports the operating frequency for this display.

### 8.2.3 Application Curve

Figure 11. Frequency Response

## 9 Power Supply Recommendations

This family of devices are passive EMI and ESD devices so there is no need to power them. Care should be taken to not violate the recommended  $V_{IO}$  specification (5.5 V) to ensure the device functions properly.

## 10 Layout

### 10.1 Layout Guidelines

- The optimum placement is as close to the connector as possible.
  - EMI during an ESD event can couple from the trace being struck to other nearby unprotected traces, resulting in early system failures.
  - The PCB designer needs to minimize the possibility of EMI coupling by keeping any unprotected traces away from the protected traces which are between the TVS and the connector.
- Route the protected traces as straight as possible.
- Eliminate any sharp corners on the protected traces between the TVS and the connector by using rounded corners with the largest radii possible.
  - Electric fields tend to build up on corners, increasing EMI coupling.

### 10.2 Layout Example

This application is typical of an 18-bit RGB display panel layout.

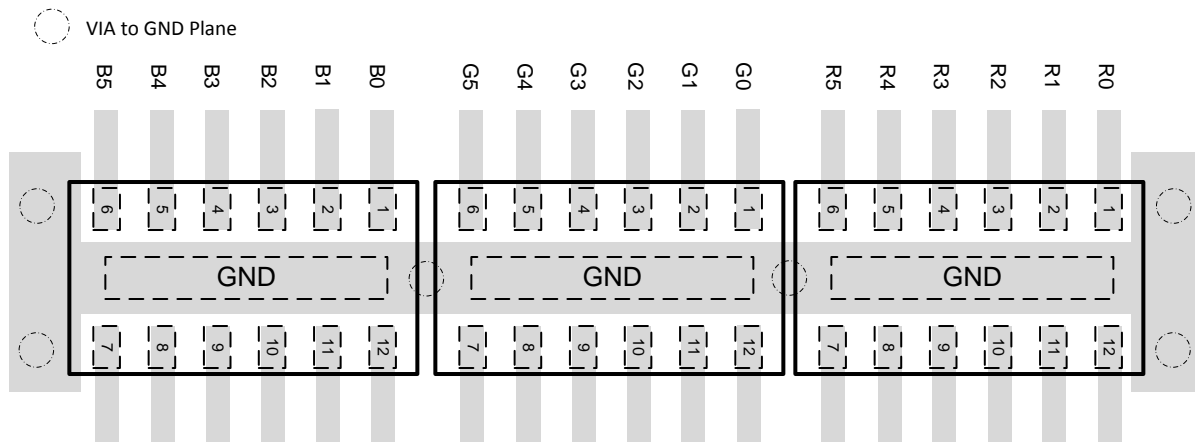

Figure 12. TPD6F003 Layout

## 11 Device and Documentation Support

### 11.1 Related Links

The table below lists quick access links. Categories include technical documents, support and community resources, tools and software, and quick access to sample or buy.

### 11.2 Trademarks

All trademarks are the property of their respective owners.

### 11.3 Electrostatic Discharge Caution

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

### 11.4 Glossary

[SLYZ022](#) — *TI Glossary*.

This glossary lists and explains terms, acronyms, and definitions.

## 12 Mechanical, Packaging, and Orderable Information

The following pages include mechanical, packaging, and orderable information. This information is the most current data available for the designated devices. This data is subject to change without notice and revision of this document. For browser-based versions of this data sheet, refer to the left-hand navigation.

**PACKAGING INFORMATION**

Orderable Device	Status (1)	Package Type	Package Drawing	Pins	Package Qty	Eco Plan (2)	Lead/Ball Finish (6)	MSL Peak Temp (3)	Op Temp (°C)	Device Marking (4/5)	Samples
TPD4F003DQDR	ACTIVE	WSO	DQD	8	3000	Green (RoHS & no Sb/Br)	CU NIPDAU	Level-1-260C-UNLIM	-40 to 85	5RS	<a href="#">Samples</a>

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSELETE:** TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "-" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead/Ball Finish - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead/Ball Finish values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

## THERMAL INFORMATION

This package incorporates an exposed thermal pad that is designed to be attached directly to an external heatsink. The thermal pad must be soldered directly to the printed circuit board (PCB). After soldering, the PCB can be used as a heatsink. In addition, through the use of thermal vias, the thermal pad can be attached directly to the appropriate copper plane shown in the electrical schematic for the device, or alternatively, can be attached to a special heatsink structure designed into the PCB. This design optimizes the heat transfer from the integrated circuit (IC).

For information on the Quad Flatpack No-Lead (QFN) package and its advantages, refer to Application Report, QFN/SOIC PCB Attachment, Texas Instruments Literature No. SLUA271. This document is available at [www.ti.com](http://www.ti.com).

## IMPORTANT NOTICE

Texas Instruments Incorporated (TI) reserves the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

TI's published terms of sale for semiconductor products (<http://www.ti.com/sc/docs/stdterms.htm>) apply to the sale of packaged integrated circuit products that TI has qualified and released to market. Additional terms may apply to the use or sale of other types of TI products and services.

Reproduction of significant portions of TI information in TI data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such reproduced documentation. Information of third parties may be subject to additional restrictions. Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyers and others who are developing systems that incorporate TI products (collectively, "Designers") understand and agree that Designers remain responsible for using their independent analysis, evaluation and judgment in designing their applications and that Designers have full and exclusive responsibility to assure the safety of Designers' applications and compliance of their applications (and of all TI products used in or for Designers' applications) with all applicable regulations, laws and other applicable requirements. Designer represents that, with respect to their applications, Designer has all the necessary expertise to create and implement safeguards that (1) anticipate dangerous consequences of failures, (2) monitor failures and their consequences, and (3) lessen the likelihood of failures that might cause harm and take appropriate actions. Designer agrees that prior to using or distributing any applications that include TI products, Designer will thoroughly test such applications and the functionality of such TI products as used in such applications.

TI's provision of technical, application or other design advice, quality characterization, reliability data or other services or information, including, but not limited to, reference designs and materials relating to evaluation modules, (collectively, "TI Resources") are intended to assist designers who are developing applications that incorporate TI products; by downloading, accessing or using TI Resources in any way, Designer (individually or, if Designer is acting on behalf of a company, Designer's company) agrees to use any particular TI Resource solely for this purpose and subject to the terms of this Notice.

TI's provision of TI Resources does not expand or otherwise alter TI's applicable published warranties or warranty disclaimers for TI products, and no additional obligations or liabilities arise from TI providing such TI Resources. TI reserves the right to make corrections, enhancements, improvements and other changes to its TI Resources. TI has not conducted any testing other than that specifically described in the published documentation for a particular TI Resource.

Designer is authorized to use, copy and modify any individual TI Resource only in connection with the development of applications that include the TI product(s) identified in such TI Resource. NO OTHER LICENSE, EXPRESS OR IMPLIED, BY ESTOPPEL OR OTHERWISE TO ANY OTHER TI INTELLECTUAL PROPERTY RIGHT, AND NO LICENSE TO ANY TECHNOLOGY OR INTELLECTUAL PROPERTY RIGHT OF TI OR ANY THIRD PARTY IS GRANTED HEREIN, including but not limited to any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information regarding or referencing third-party products or services does not constitute a license to use such products or services, or a warranty or endorsement thereof. Use of TI Resources may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

TI RESOURCES ARE PROVIDED "AS IS" AND WITH ALL FAULTS. TI DISCLAIMS ALL OTHER WARRANTIES OR REPRESENTATIONS, EXPRESS OR IMPLIED, REGARDING RESOURCES OR USE THEREOF, INCLUDING BUT NOT LIMITED TO ACCURACY OR COMPLETENESS, TITLE, ANY EPIDEMIC FAILURE WARRANTY AND ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT OF ANY THIRD PARTY INTELLECTUAL PROPERTY RIGHTS. TI SHALL NOT BE LIABLE FOR AND SHALL NOT DEFEND OR INDEMNIFY DESIGNER AGAINST ANY CLAIM, INCLUDING BUT NOT LIMITED TO ANY INFRINGEMENT CLAIM THAT RELATES TO OR IS BASED ON ANY COMBINATION OF PRODUCTS EVEN IF DESCRIBED IN TI RESOURCES OR OTHERWISE. IN NO EVENT SHALL TI BE LIABLE FOR ANY ACTUAL, DIRECT, SPECIAL, COLLATERAL, INDIRECT, PUNITIVE, INCIDENTAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES IN CONNECTION WITH OR ARISING OUT OF TI RESOURCES OR USE THEREOF, AND REGARDLESS OF WHETHER TI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Unless TI has explicitly designated an individual product as meeting the requirements of a particular industry standard (e.g., ISO/TS 16949 and ISO 26262), TI is not responsible for any failure to meet such industry standard requirements.

Where TI specifically promotes products as facilitating functional safety or as compliant with industry functional safety standards, such products are intended to help enable customers to design and create their own applications that meet applicable functional safety standards and requirements. Using products in an application does not by itself establish any safety features in the application. Designers must ensure compliance with safety-related requirements and standards applicable to their applications. Designer may not use any TI products in life-critical medical equipment unless authorized officers of the parties have executed a special contract specifically governing such use. Life-critical medical equipment is medical equipment where failure of such equipment would cause serious bodily injury or death (e.g., life support, pacemakers, defibrillators, heart pumps, neurostimulators, and implantables). Such equipment includes, without limitation, all medical devices identified by the U.S. Food and Drug Administration as Class III devices and equivalent classifications outside the U.S.

TI may expressly designate certain products as completing a particular qualification (e.g., Q100, Military Grade, or Enhanced Product). Designers agree that it has the necessary expertise to select the product with the appropriate qualification designation for their applications and that proper product selection is at Designers' own risk. Designers are solely responsible for compliance with all legal and regulatory requirements in connection with such selection.

Designer will fully indemnify TI and its representatives against any damages, costs, losses, and/or liabilities arising out of Designer's non-compliance with the terms and provisions of this Notice.
