

Sensitive 0.8 A SCR thyristor

Datasheet - production data

Description

Thanks to highly sensitive triggering levels, the 0.8 A P0102DN SCR thyristor is suitable for all applications where available gate current is limited. This device offers a high blocking voltage of 400 V, ideal for applications like interrupters circuits in 110 V mains regions.

The surface mount SOT-223 package allows compact, SMD based designs for automated manufacturing.
